(54) Title: ONE BUTTON EXTERNAL BACKUP

(57) Abstract: A, preferably external, storage device (114) is provided with a button (112) or other user input which, when activated causes a launch of an application such as a backup of data from the host device (124) onto the external storage device (114). Preferably, the external storage device (114) includes a hard disk drive (116). Communication with the host device (124) can be made using USB, IEEE 1394, Ethernet, wireless links or other links (126). The external device (114) is configured to allow the host (124) to become aware of a button press, e.g., by a notification or interrupt technique, or by a polling technique.
